on April 23, 1985

Attached is the schedule of corrective actions submitted by the State of Illinois for the deficiencies noted in the Final Report for the Dresden Nuclear Power Plant Offsite Radiological Emergency Preparedness Exercise conducted on April 23, 1985. The exercise report was sent to you on August 6, 1985.

The Federal Emergency Management Agency (FEMA) Headquarters and Region V staff have reviewed the schedule of corrective actions submitted by the State and found it to be adequate. Based on the exercise and the corrective actions schedule, we cannot identify any impediments to protecting the health and safety of the public in the event of an incident at the Dresden Nuclear Power Plant. Therefore, the approval under FEMA Rule 44 CFR 350 will remain in effect.
