Re: Rob Plosz on-the-job training, use of licensed material

Dear Ms. Holt:

Rob Plosz has been working under my direct supervision for the last three months for his on-the-job well logging training. Under my direction as the individual responsible under materials license #21-24496-01, Rob trained from July through October in the proper operation and safety procedures for logging. Rob has a very comprehensive understanding of radiation safety techniques and technologies. He is very conscientious and would demand strict compliance with the rules.

From 1983 until April, 1985 when Rob was transferred to our Michigan project, Rob was Department Head, Minefield Department for Kalium Chemicals, a wholly-owned subsidiary of PPG Industries, Inc. In this capacity, the Logging Supervisor reported to him. Rob was in charge of overseeing the safety and training programs for well loggers as directed by the Logging Supervisor. Several years earlier, Rob was Process Engineer in the Minefield Department. In this capacity, he worked daily with the Logging Supervisor in determining logging activities.

In April, 1985, Rob completed the Gulf Nuclear, Inc. 24-hour radiation safety school for well loggers. I feel Rob Plosz is well trained and qualified to serve as the radiation protection officer.

Sincerely,

A handwritten signature in cursive script, appearing to read 'D. Smith'.
