RE: 12-00088-06 and 12-00088-07

Dear Mr. Mallett:

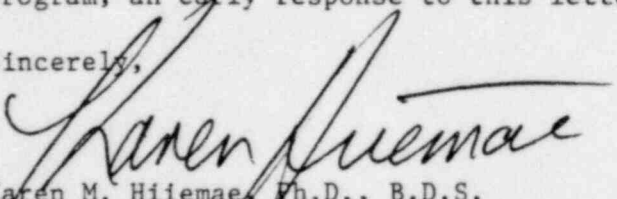

Enclosed are two copies of a revised application for renewal of Radioactive Material License Number 12-00088-06. This application replaces in entirety the previous application dated August 21, 1984.

So that unification of the programs currently used on the east and west ends of the campus may begin, we request that we be allowed to gradually replace certain operational procedures in 12-00088-06. We wish to begin this gradual transition immediately and will confine the changes to the following parts of the program.

1. Ordering, receiving and safely opening packages containing radioactive material.
2. Accounting for and inventory of radioactive material.
3. Disposing of radioactive waste.

Given that we believe these changes will greatly facilitate our operational program, an early response to this letter would be greatly appreciated.

Sincerely,

  
Karen M. Hiemae, Ph.D., B.D.S.  
Interim Dean, Graduate College and  
Associate Vice Chancellor for Research  
and Graduate Education
