Dear Friends:-

Thank God for Lirrick No. 1. But now we desperately need the completion of the it. Pleasant pumping station. It is half done, but should be finished.

No. 1. It will take three quarters of an inch of the river's water so we can wash our cars again, and will have the needed drinking water. And No. 2. It will give Lirrick enough water to operate efficiently, and the money we get from the Electric Company will help the tax payers foot the bill, plus it will eliminate further litigation, so costly.

REV. ALVIN J. FAINE.
