DAVIS TO DIRCKS

- 1 -

WM DOCKET CONTROL
RESIDENT

MEMORANDUM FOR: William J. Dircks
Executive Director for Operations

'85 MAR 15 P3:12

FROM: John G. Davis, Director
Office of Nuclear Material Safety
and Safeguards

SUBJECT: CONTROL OF NRC RULEMAKING - EDO QUARTERLY REVIEW

In response to your memorandum of February 13, 1984, and in accordance with instructions provided in subsequent memoranda from the Office of Nuclear Regulatory Research (NRR), the Office of Nuclear Material Safety and Safeguards (NMSS) has reviewed the ongoing or proposed rulemaking activities listed in Attachment 1 to this memorandum. On the basis of our review, we recommend approval of continued activity on these rules, with the exception of "Certification of Industrial Radiographers" and "Shallow Land Disposal of Radioactive Waste". Staff efforts on these are now directed toward terminating the two rulemaking activities.

Also, as directed by your memorandum and the subsequent instructions from RES, we have prepared Review Packages for all of the listed rulemaking activities. These are included as attachments to this memorandum, with copies forwarded to RES and the other reviewing offices.

(Signed) John G. Davis

John G. Davis, Director
Office of Nuclear Material Safety
and Safeguards

TITLE:
Financial Responsibility Standards for Long Term Care for Low
Level Waste Disposal Sites

CER CITATION:
10 CER 61

ABSTRACT:
The proposed rule would provide standards that would ensure that each licensee responsible for the disposal of low-level radioactive waste possess an adequate bond, surety, or other financial arrangement to permit completion of all requirements established by the Commission for ~~decontamination, long-term care, decommissioning, and site closure~~. Section 151 of the Nuclear Waste Policy Act authorizes the NRC to develop standards for financial arrangements for low-level radioactive waste site closure. Comments on the ANPRM will help define the nature and scope of the action. NRC resource scheduling is being developed.
