

NOV 27 1985

Docket No. 50-322

Long Island Lighting Company
ATTN: Mr. John D. Leonard, Jr.
Vice President - Nuclear
P. O. Box 618
Shoreham Nuclear Power Station
Wading River, New York 11792

Gentlemen:

Subject: Inspection Report No. 50-322/85-38

A routine radiological safety inspection was conducted by Mr. R. Nimitz of this office on October 21 - 25, 1985 of your Shoreham Nuclear Power Station. The findings of this inspection were discussed with Mr. Steiger at the conclusion of the inspection.

The inspection covered: previous findings; start-up survey program; preoperational and start-up testing of the off-gas system; high radiation area controls; and radiological controls during source changeout.

No violations were observed and no response to this letter is required. The actions taken to close out the findings of the special Post Accident Sampling Inspection were commendable. Our review of your high radiation area controls program indicates additional attention to this area is required. These concerns have been discussed and acknowledged by your staff, and corrective actions are being implemented.

In accordance with 10 CFR 2.790(a), a copy of this letter and the enclosure will be placed in the NRC Public Document Room.

Your cooperation with us in this matter is appreciated.

Sincerely,

Original Signed By:
