U.S. Nuclear Regulatory Commission, Region 1
Nuclear Material Section B
631 Park Avenue
King of Prussia, Pennsylvania 19406

Gentlemen:

Enclosed herewith please find a fully executed NRC Form 313, together with supporting documentation. You will note that the name of the applicant reads as "Radiation Calibration Laboratory, Division of Bio-Medical Radiation Systems, Inc., a New Jersey Corporation." Please be advised that Bio-Medical Radiation Systems, Inc., is the new corporate name for the New Jersey Company formerly known as Houde Glass Corporation. Please expedite the processing of this application.

We have purchased the radiation calibration business of Reed Instruments, Inc., Boonton, New Jersey. They are now out of business. We shall be servicing the unexpired contract they had with E.R. Squibb & Sons, Inc; Medotopes Division, of New Brunswick, New Jersey, and would like to make certain that there is no serious break in the continuity of the work being done.

We have agreed to take over the sources of Reed Instruments, Inc., once the license has been issued. Mr. Reed will be doing the work for us at that time.

Thank you for your help.

Very truly yours,

By:

Michael T. Gasparak
