

JAN 24 1986

Docket No. 50-454

Docket No. 50-455

Commonwealth Edison Company

ATTN: Mr. Cordell Reed

Vice President

Post Office Box 767

Chicago, IL 60690

Gentlemen:

The Nuclear Regulatory Commission has completed its SALP assessment relating to the performance of the Byron Nuclear Station and will present its findings at a meeting on February 3, 1986, at 10:00 a.m. at Byron Station. Arrangements for this meeting were made between D. Farrar of your staff and R. Warnick of Region III on January 24, 1986.

We encourage Commonwealth Edison Company to have appropriate corporate and plant management representation at the meeting to ensure a mutual understanding of the issues and findings being presented by NRC.

While this meeting is considered a presentation and discussion forum between Commonwealth Edison and the NRC, the meeting will be opened to any other interested parties as observers. Those persons outside the licensee and NRC staffs should inform the Regional Office, in advance of the meeting, of their intent to participate.

We hope this meeting will benefit your organization and provide you with a meaningful characterization of the overall safety performance for the Byron Plant.

Sincerely,

"Original Signed by E. G. Greenman" for

C. E. Norelius, Director
Division of Reactor Projects
