Gentlemen

Subj: Request for renewal of NRC License Number 22-01376-03

As outlined in your "Instructions for preparation of application for license renewal" we have reviewed our NRC file regarding our Ni-63 detector sources.

Our review indicates the number, type, disposition use and internal procedures are accurately represented on our current license expiring October 31, 1985. We wish to continue to operate under our current license.

The applicable document in our file reflecting our current program are as follows by date of submittal:

March 13, 1980 License Renewal Application

We will continue to operate in accordance with those documents and applicable NRC regulations and license conditions. Based on our September 5, 1985 phone discussion with the Glen Ellyn Illinois licensing section, we are enclosing a check for \$120.00 for this renewal request.

Cordially

W. Welbes
