Uranium Recovery Field Office, Region IV
U. S. Nuclear Regulatory Commission
730 Simms Street, Suite 100A
Denver, CO. 80225

October 6, 1985

Dear Mr. Pettengil:

Enclosed herewith please find the welding procedures and a sketch of the new modifications made on the leach tanks at the White Mesa Mill in Blanding, Utah. These modifications were made by Mr. W. W. Brice, Master Mechanic of the White Mesa Mill and by Mr. H. R. Roberts, Registered Professional Engineer in the State of Colorado. We have also included a statement from one of our Metallurgical Engineers who is also a Registered Professional Engineer in the State of Colorado in regards to the integrity of these modifications.

Magnetic particle examination on each of the modifications is now underway by an independent certified contractor and any defects encountered will be corrected.

If you need any additional information please advise.

Very truly yours,

D. K. Sparling
D. K. Sparling
