Re: License # 29-15105-01  
Docket # 030-08578  
Control # 10680

Dear Mr. Glenn,

In reference to your request for additional information, I am submitting the following data for your consideration:

1) The permanent storage area for the gauge, is located on the second floor in the Quality Control Laboratory storage room. (Permanent storage area sketch attached).

2) When in permanent storage the gauge handle is latched in the top or stored position and secured by a lock. The gauge in turn is placed in the shipping case and locked. The Quality Control laboratory is generally manned all of the time and we maintained a limited access policy in this area, due to the testing and type of equipment in the laboratory. In the event that the laboratory technician is not present, the storage area and the Quality Control laboratory is locked and the entire building is monitored by an alarm system keyed into the local police department.

3) Any individuals who are not under my direct supervision (e.g. within my visual range) and are to be using the portable gauge will have completed the manufacturer's training program.

Thanking you for your attention in this matter.

Respectfully,

TRI COUNTY ASPHALT CORPORATION
