Crown Point, IN 46307

Gentlemen:

Enclosed is Amendment No. 01 to your NRC License No. 13-16474-03 in accordance with your request.

Please review the enclosed document carefully and be sure that you understand all conditions. You must conduct your program involving radioactive materials in accordance with the conditions of your NRC license, representations made in your license application, and NRC regulations. In particular, note that you must:

1. Operate in accordance with NRC regulations 10 CFR Part 19, "Notices, Instructions and Reports to Workers; Inspections," 10 CFR Part 20, "Standards for Protection Against Radiation," and other applicable regulations.
2. Possess radioactive material only in the quantity and form indicated in your license.
3. Use radioactive material only for the purpose(s) indicated in your license.
4. Notify NRC in writing of any change in mailing address.
5. Request and obtain appropriate amendment if you plan to change ownership of your organization, change locations of radioactive material, or make any other changes in your facility or program which are contrary to your license conditions or representations made in your license application and any supplemental correspondence with NRC. Any amendment request should be accompanied by the appropriate fee specified in 10 CFR Part 170.
6. Submit a complete renewal application with proper fee or termination request at least 30 days before the expiration date on your license. You will receive a reminder notice approximately 90 days before the expiration date. Possession of radioactive material after your license expires is a violation of NRC regulations.
7. Request termination of your license if you plan to permanently discontinue activities involving radioactive material prior to your expiration date.

NOV 13 1985

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions and representations in your license application will result in enforcement action against you in accordance with the General Policy and Procedures for NRC Enforcement Actions, 10 CFR Part 2, Appendix C.

If you have any questions or require clarification of any of the above stated information, contact us at (312) 790-5625.

Sincerely,

Re: Notice of Violation dated
9-26-85. License #13-16474-03

Dear Mr. Sreniawski,

We are submitting the following information in regard to the deficiencies found during an inspection by Mr. W. P. Reichhold on September 4, 1985.

Since July 1, 1985, Ms. Cheryl Pauer replaced Mr. Andrew Livovich as chemist with our laboratory. We are hereby requesting that Ms. Cheryl Pauer be designated as the person to supervise the use of the licensed material. Ms. Pauer has a B. S. degree in chemistry. She has previous experience with Perkin-Elmer Gas Chromatograph with a flame ionization detector and data station. On August 2, 1985, Ms. Pauer received eight (8) hours of training from Mr. Carsten Falkenberg, Applications Chemist, Packard Instrument Company, 2200 Warrenville Rd., Downers Grove, Illinois. Ms. Pauer will not perform any maintenance or repair on the machine nor will she remove the source or foil from the detector cell.

Due to the retirement of Mr. Livovich the test for radiation leakage was not conducted on schedule. We have ordered the appropriate test kit, (see enclosed purchase order copy), and will not operate our G.C. until we are in compliance.

We thank you for bringing these deficiencies to our attention and we hope our proposal is acceptable.

If you have any questions, please contact me.

Sincerely,

Nicholas M. Doffin
