Re: Amendment to License 14-01137-01

Gentlemen:

We request amendment to our radioactive materials license #14-01137-01 for the following:

CHANGE IN LOCATION OF RIA DEPARTMENT: Enclosed please find a facility sketch representing the design of our new RIA Department. The storage refrigerator will remain in its present location.

We confirm a "close-out radiation survey" of the current facilities will be performed before that area is released for unrestricted use. Action levels will be ≤ 0.05 mr/hr as₂ measured with a low level G. M. survey meter and 200 DPM/100 cm², as measured with a well counter. The NRC "Guide for Decontamination of Facilities" dated July 1982, will be followed. Records of this survey will be maintained at our hospital for NRC inspection.

We trust the information contained herein is sufficient to grant our request for this amendment. We look forward to receipt of that document.

Sincerely,

S. Patricia Clare Sullivan, RSM

Sister Patricia Clare Sullivan, RSM
President
