U. S. NUCLEAR REGULATORY COMMISSION

DOCKET NO. 50-528 AND 50-529

⁸⁵
(2.206)

SEP 19 A8:58

ARIZONA PUBLIC SERVICE COMPANY, ET AL.

OFFICE OF THE
DOCKETING & SERVICE
BRANCH

PALO VERDE NUCLEAR GENERATING STATION, UNITS 1 AND 2

ISSUANCE OF DIRECTOR'S DECISION UNDER 10 CFR 2.206

Notice is hereby given that the Director, Office of Nuclear Reactor Regulation, has denied a Petition filed under 10 CFR 2.206 by Myron L. Scott on behalf of the Coalition for Responsible Energy Education regarding the Palo Verde Nuclear Generating Station (PVNGS), Units 1 and 2. The Petitioner requested that (1) an order be issued to the Arizona Public Service Company to show why the Operating License for PVNGS Unit 1 and the Construction Permit for PVNGS Unit 2 should not be suspended and (2) future licensing activities for PVNGS Units 1 and 2 be deferred, pending completion of certain actions relating to spray pond piping corrosion at PVNGS Units 1 and 2. As a basis for the Petition, the Petitioner alleged that the corrosion will reduce the margin of safety for the spray pond system to below acceptable levels and may have adversely affected other safety-related systems.

The Staff has considered the Petitioner's allegations and has determined that they do not provide an adequate basis for the relief requested. The reasons are fully described in a "Director's Decision Under 10 CFR 2.206," (DD-85-15), which is available for public inspection at the Commission's Public Document Room located at 1717 H Street, N.W., Washington, DC 20555, and at the Phoenix Public Library, Business, Science and Technology Department, 12 East McDowell Road, Phoenix, Arizona 85004.
