Dr. J. Nelson Grace
Regional Administrator, Region II
U.S. Nuclear Regulatory Commission
Suite 2900
101 Marietta Street NW
Atlanta, Georgia 30323

Dear Dr. Grace:

Re: St. Lucie Units 1 and 2
Docket Nos. 50-335 and 50-389
Semi-Annual Radioactive Effluent Release Report

Attached is the Radioactive Effluent Release Report for the period of January 1, 1985 through June 30, 1985 for St. Lucie 1 and 2, as required by Technical Specification 6.9.1.10.

The data for the "Volume of Dilution Water Used During Period" on Tables 3.3-1 and 3.3-2 are reported, in accordance with plant procedures, to be the volume of dilution water used during periods of release only. The total volume of dilution water used for each unit during the entire period would be as follows:

	<u>1st Quarter (liters)</u>	<u>2nd Quarter (liters)</u>
St. Lucie Unit 1	2.46E11	2.46E11
St. Lucie Unit 2	2.46E11	2.46E11

The Plant procedures will be changed so that in the future, we will report the total volume of dilution water used during the period, consistent with the interpretation contained in the NRC letter, on that subject, dated August 8, 1985.

Should you or your staff have any questions on this information, please contact us.

Very truly yours,

J.W. Williams, Jr.
Group Vice President
Nuclear Energy
