Response to Request for Additional Information  
Regarding NRC Generic Letter 83-28

Dear Mr. Noonan:

NRC Generic Letter 83-28, "Required Actions Based on Generic Implications of Salem ATWS Events," was addressed by Houston Lighting and Power Company (HL&P) in letters dated June 28, 1985, and October 14, 1985. Some actions remained to be completed at the time of submittal. Programs, procedures, and plant modifications will be in place for Units 1 and 2 prior to fuel load for the respective units.

In addition, HL&P has reviewed the STP Technical Specifications, and no post-maintenance test requirements have been identified that degrade safety.

If you should have any questions on this matter, please contact Mr. M. A. McBurnett at (512) 972-8530.

Very truly yours,

  
M. R. Wisenburg  
Manager, Nuclear Licensing
