Gentlemen:

We have reviewed your plan dated October 1, 1985, for decontaminating portions of your plant so that they can be deleted from your Special Nuclear Materials License No. SNM-696 and released for unrestricted use. We find your plan acceptable (see Evaluation Report enclosed).

In order to remove these portions from your license, it will be necessary for you to submit an amendment application which includes your survey results.

Sincerely,

*G. A. Derry*  
for W. T. Crow, Acting Chief  
Uranium Fuel Licensing Branch  
Division of Fuel Cycle and  
Material Safety, NMSS
