John E. Glenn, Ph.D.
Chief Nuclear Materials Section B
Nuclear Regulatory Commission
Division of Engineering and Technical Programs
631 Park Avenue
King of Prussia, PA 19406

Dear Dr. Glenn:

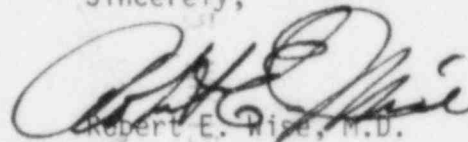

This letter requests an amendment to our materials license #20-05766-02, amendment #35 "Corrected Copy" dated December 13, 1984.

This amendment request is in addition to our amendment request dated February 13, 1985. The purpose of this amendment request is to obtain approval for use of Iodine 125 for in vitro labelling of proteins.

Please note also that our present amendment #35 "Corrected Copy" has a typographical error in section 8E; it should read 2,000 millicuries total for sources authorized in subitem 6.E." The present license reads "2 millicuries...." I brought this to the attention of Ms. Judy Foster of your office on February 11, 1985; we agreed that the error was in typing and not in the amendment request.

If you have any questions about this submission, please call the radiation safety officer, Robert S. Wenstrup, Ph.D. at (617) 273-8166.

Sincerely,

Robert E. Wise, M.D.
