DFHarmon, LR

Gentlemen:

Pursuant to your request of October 16, 1961, we are enclosing Source Material License No. STB-489.

With regard to your request that "Appendix A" of your application be withheld from public inspection, the Atomic Energy Commission has determined that public inspection of this attachment is not required in the public interest and would adversely affect the interest of the DuPont Company. Accordingly, the document is being withheld from public inspection as provided in Section 2.790(b) of the Commission's Rules of Practice (10 CFR Part 2). Such withholding from public inspection shall not, however, affect the rights of persons properly and directly concerned to inspect the document.

In addition, pursuant to the telephone conversation on November 20, 1961 between your Mr. Gorman and our Mr. Harmon in which Mr. Gorman stated that the operations listed in the last item of "Appendix A" of your application dated October 16, 1961, would be conducted under an appropriate AEC license at your Curtis Bay plant, Condition 10 was added to Source Material License No. STB-489.

If you should have any questions about these matters, please feel free to write.

Very truly yours,

L. P. Roger Beard, Chief
Administrative Branch
Division of Licensing and Regulation
