Executive Vice President

Atlanta, GA 30302

Gentlemen:

SUBJECT: MEETING SUMMARY - VOGTLE FACILITY - DOCKET NO. 50-424

This refers to the management meeting conducted at your request in the NRC Region II Office on January 9, 1986. This meeting was held to brief the NRC on the Vogtle Readiness Review Module entitled "Nuclear Steam Supply System" and "Foundation Material and Backfill."

It is our opinion that this meeting was beneficial and has provided a comprehensive overview of the Vogtle Readiness Review Program and, specifically, these modules. This in-depth presentation will better enable the NRC to conduct its evaluations.

With respect to your proposal regarding a program review of the Vogtle Readiness Review Pilot Program, we concur that such a review would be beneficial. We will contact you in the near future to schedule this meeting and to develop a mutually agreeable agenda.

In accordance with Section 2.790 of NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

Should you have any questions concerning these matters, we will be pleased to discuss them.

Sincerely,
