E. I. DuPont de Nemours & Company
Wilmington 98, Delaware

Attention: Mr. H. J. Gorman, Jr.
Asst. Purchasing Agent
Chemicals & Containers Division

Gentlemen:

Enclosed is Source Material License STB-489, which as we advised you by teletype of August 17 has been amended as requested by your letter of July 20, 1962, as supplemented by your letter of August 8, 1962, and teletypes of August 15 and 17, 1962. You will note that the August 15 supplement states that "only liquid decanted from top settling tank discharged." Accordingly, this is a condition of the license. Your August 17 letter, received August 20, 1962, is being treated as an application for amendment of the license to permit the discharge of effluent without use of the settling tank.

In order to continue the review of this amendment request we require a detailed description of the filter, information regarding its efficiency under the conditions of use, as well as a more detailed description of the tests run on samples taken directly from the process effluent to show that they are representative and that the analytical procedures provide accurate indication of the total amount of both dissolved and undissolved thorium in the effluent.

With regard to your request that the supplement to Appendix A to your October 16, 1961, letter, transmitted with your August 7, 1962, attachment to your August 8, 1962, letter be withheld from public inspection, the Atomic Energy Commission has determined that public inspection of this supplement is not required in the public interest, and would adversely affect the interest of the DuPont Company. Accordingly, the document is being withheld from public inspection as provided in Section 2.510 of the Commission's Rules of Practice (10 CFR 2). Such withholding from public inspection shall not, however, affect the rights of persons properly and directly concerned to inspect the document.

Sincerely yours,

Herb E. Price, Assistant Director
Division of Licensing and Regulation
