U. S. Atomic Energy Commission
Division of Licensing and Regulations
Washington 25, D. C.

Gentlemen:

Enclosed is an application for a license to cover our processing of uranium ore in a pilot plant at 5950 McIntyre Road, Golden, Colorado.

We are only anticipating pilot plant studies of the leaching of uranium ore and do not expect to be producing any concentrate. The entire program will use a total of approximately 25 tons of ore over a period of two or three months. Operations will be conducted in compliance with the standards for radiation protection, Part 20 CFR 10.

It is not expected that any source material or residue other than analytical samples will leave our property.

Yours very truly,

Wayne C. Hazen
Wayne C. Hazen, Director
Metallurgical Laboratory
