SEP 17 1985

Texas Utilities Electric Company  
ATTN: Mr. W. G. Council  
Executive Vice President  
400 North Olive Street, L. B. 81  
Dallas, Texas 75201

Gentlemen:

This refers to the inspection conducted under the Resident Inspection Program by Mr. J. E. Cummins and others of this office during the period December 19, 1984, through March 31, 1985, of activities authorized by NRC Construction Permits CPPR-125 and CPPR-126 for the Comanche Peak facility, Units 1 and 2, and to the discussion of our findings with Mr. J. T. Merritt of your staff at the conclusion of the inspection.

Areas examined during the inspection included plant status, action on previous findings, action on applicant identified design/construction deficiencies (10 CFR Part 50.55(e) reports), review of purchase order and related documentation for fuel building liner plates, followup on 10 CFR Part 21 report, Inspection and Enforcement Bulletin followup, action on Special Review Team (SRT) identified deficiencies, special plant tours, followup on alleged improper construction practices involving CPSES main condensers, review of concrete placement procedures, and observations and reviews of reinforcing steel splices. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspectors. These findings are documented in the enclosed inspection report.

Within the scope of the inspection, no violations or deviations were identified.
