Addendum 1 to Revision 9 to the Final Safety Analysis Report
And Addendum 1 to Annual Report

Northeast Nuclear Energy Company (NNECO) hereby submits, as Attachment 1, Addendum 1 to Revision 9 to the FSAR in the form of replacement pages as required. Revision 9 to the FSAR was submitted on June 28, 1996. Pursuant to 10CFR50.71(e)(2)(i), I certify that this revision accurately presents changes completed since our previous submittal that are necessary to reflect information and analyses submitted to the Commission or prepared pursuant to Commission requirements, as of the previous submittal. NNECO is currently performing an extensive review of the Millstone Unit No. 3 design and licensing bases which has resulted in some changes provided herein, and may result in significant future changes to the FSAR. Changes from this effort will be provided in a future submittal.

For planning purposes and to enable orderly review by the Commission of the expected large volume of changes to the FSAR resulting from the ongoing reviews, NNECO intends to submit periodic addendums to FSAR Revision 9 as progress of the verification effort and volume of changes dictate. Revision 10 to Millstone Unit No. 3's FSAR is scheduled to be submitted by June 30, 1997 to cover changes as of December 31, 1996 (6 months current) pursuant to 10CFR50.71(e)(2)(i). Subsequently, if necessary, addendums to Revision 10 will be submitted as progress of the verification effort and volume of changes dictate.

Pursuant to 10CFR50.71(e) and 10CFR50.4(b)(6), this transmittal consists of one original and ten copies. As stipulated in 10CFR50.71(e)(2)(ii): "This submittal shall include an identification of changes made under the provisions of Section 50.59 but not previously submitted to the Commission." Pursuant to Section 50.59(b) with the exception noted, such
