SECRET NO. 40-6175

Suppl. Only

Dr. Don Ross
Division of Licensing and Regulation
U. S. Atomic Energy Commission
Washington 25, D. C.

Dear Dr. Ross:

I spoke briefly with Harry Schulte on October 6, 1961, and he mentioned that your office is in the process of considering a proposal to allow the use of one of the so-called "size selective" samplers for atmospheric sampling in uranium mills.

As uranium mill operators, we are of course interested in this application and wonder if current thinking in the Division of Licensing and Regulation would tend to favor or reject such a device.

The presentation of the NASL and LASL data for these devices appears fairly comprehensive; however, if there is any contribution that can be made by a uranium mill operating group, please let me know and I will try to offer our facilities.

Thank you for your consideration.

Very truly yours,

John F. Potter
