Gentlemen:

This is in reference to your application dated April 10, 1985 to amend License No. 37-03572-06. In order to continue our review, we need the following additional information:

1. You state in Item 7 that Mr. Fenwick will attend a Nuclear Safety Course. Please confirm that Mr. Fenwick has already completed the course, or give the date when the course will be completed. We need a firm commitment as to this training if Mr. Fenwick is to act as Radiation Safety Officer.
2. 10 CFR 19.12 requires that licensees instruct workers and others (e.g., security, custodial, and maintenance personnel) frequenting any portion of a restricted area in the subjects enumerated in that section. Please submit a training program that will meet these requirements.
3. Please describe the facilities where licensed material will be used. These include storage, manufacturing, assembly, or other areas where licensed material will be stored or used. 10 CFR 30.33(a)(2) provides that an application for a specific license will be approved if the applicant's equipment and facilities are adequate to protect health and minimize danger to life or property. Please submit information that demonstrates that you meet this requirement.
4. Describe your survey procedures to detect radioactive contamination in your facility. State your action limits, and what action will be taken when these contamination limits are exceeded.
