Gentlemen:

Subject: NOTICE OF EXPIRED LICENSE

This refers to the telephone discussion between Steven Courtrmanche of this office and yourself on January 10, 1986. The subject of the discussion was the fact that NRC records show that the license identified above has expired and no renewal application has been filed in accordance with Section 30.37 of Title 10, Code of Federal Regulations, Part 30.

From this discussion we learned that you do not have any licensed material in your possession. Therefore, you must take the following actions:

1. Prepare a statement which explains the method of disposal of the materials, including: what material was involved, how it was disposed of or to who it was shipped, and when this was done. The enclosed Form NRC-314 may be used for this purpose.
2. If the activities conducted under the expired license were subject to the reporting requirements of 10 CFR Part 20, Section 20.407, you must submit the annual report required by 20.407 for the current calendar year and a termination report required by Section 20.408 for individuals engaged in activities under the expired license. Those reports must be submitted to the Director of Management and Program Analysis, U. S. Nuclear Regulatory Commission, Washington, D.C. 20555.
3. Decontaminate the facility, equipment, and systems wherein materials were used, make a comprehensive radiation survey of the facility, and prepare a report showing the results of the survey. The enclosed "Guidelines for Decontamination..." provide guidance for the decontamination effort and limits for residual contamination.

You are required to reply to this Notice within 30 days of the date above. Address your reply to Region I, U. S. Nuclear Regulatory Commission, Attention: Chief, Nuclear Materials Section A, 631 Park Avenue, King of Prussia, Pennsylvania 19406.
