Subject: Property transfer of sealed source

Dick Prevatte at St. Lucie has an NRC sealed CS-137 eight microcurie source that was previously used for Z-tech radiation survey instrument calibration. He no longer has a Z-tech instrument and wants to get rid of the sealed source. The source has no NRC property sticker on it and is not included on the list of NRC property for which the SRI had to sign for custody.

To whom should he send the source, what is the correct paperwork needed, and what is the required packaging and shipping method?
