Gray File

Mr. Joe Williams, Jr.
Vice President, Nuclear
Toledo Edison Company
Edison Plaza - Stop 712
300 Madison Avenue
Toledo, Ohio 43652

Dear Mr. Williams:

SUBJECT: RESPONSE TO GENERIC LETTER 83-28, ITEMS 4.2.1 AND 4.2.2,
DAVIS-BESSE NUCLEAR POWER STATION

The staff has reviewed the following portions of Toledo Edison's response to Generic Letter 83-28:

- o Reactor Trip System Reliability (Preventive Maintenance), Item 4.2.1
- o Reactor Trip System Reliability (Trending of Parameters), Item 4.2.2

Toledo Edison's response to the above items were transmitted by letters dated November 7, 1983 (Serial No. 1000) and March 29, 1985 (Serial No. 1130).

Following review of the documents cited, we have concluded that: 1) the preventive maintenance program includes the major elements identified by the staff and will be conducted at an interval not to exceed 12 months; and 2) the trending of parameters is being accomplished through participation with the B&W Owners Group Reliability Monitoring Program. Based on the conclusions previously listed, we have determined that the responses to Items 4.2.1 and 4.2.2 of Generic Letter 83-28 are acceptable.

Sincerely,

*ORIGINAL SIGNED BY

JOHN F. STOLZ*
