

FEB 7 1984

MEMORANDUM FOR: John G. Davis, Director  
Office of Nuclear Material Safety and Safeguards

FROM: Richard E. Cunningham, Director  
Division of Fuel Cycle and Material Safety

SUBJECT: PROGRESS REPORT ON PART 35

This is in response to your memorandum of December 20, 1983 that asked for a monthly progress report on Part 35. The revision of Part 35 is on schedule.

The staff plan that was circulated December 6, 1983 indicated that the first milestone, distribution of the regulation, preamble, and regulatory guide for review, would be reached on February 28, 1984. Those materials will be distributed about February 10, 1984. The package will also include drafts of a transmittal memorandum from you to Mr. Dircks, a Commission paper, a periodic and systematic review statement, a regulatory analysis, an environmental impact analysis, a summary analysis of comments on the SECY-83-62 proposed regulation, and a summary table of all calendar year 1982 human use licensee citations that shows how the citations would be issued under the proposed regulation.

Original Signed by  
Richard E. Cunningham

Richard E. Cunningham, Director  
Division of Fuel Cycle and  
Material Safety
