The Nuclear Regulatory Commission's regulations shall govern the licensee's statements in applications or letters, unless the statements are more restrictive than the regulations.

1. Item 10 of the application dated August 17, 1983, requires that linearity tests of the dose calibrator be performed on a quarterly basis.

Contrary to the above, linearity checks were not performed between July 12, 1983 and November 14, 1983, November 14, 1983 and May 17, 1984, and May 7, 1984 and October 1, 1984. These dates reflect three intervals that exceed the requirement.

2. Item 17 of the application dated August 17, 1983, requires that all elution, preparation, and injection areas be surveyed daily with an appropriate low-range survey meter and that a wipe survey be performed weekly.

Contrary to the above, daily surveys have not been performed since January 1983, and weekly wipe surveys were not performed for the weeks of August 24, August 31, September 7, and September 14, 1985.
