GENERAL ELECTRIC

NUCLEAR FUEL MANUFACTURING DEPARTMENT

GENERAL ELECTRIC COMPANY • P.O. BOX 780 • WILMINGTON, NORTH CAROLINA 28402  
November 8, 1985

Chief, Uranium Fuel Licensing Branch  
Division of Fuel Cycle & Material Safety  
Nuclear Material Safety & Safeguards  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Dear Sir:

Reference: NRC License SNM-1097, Docket #70-1113

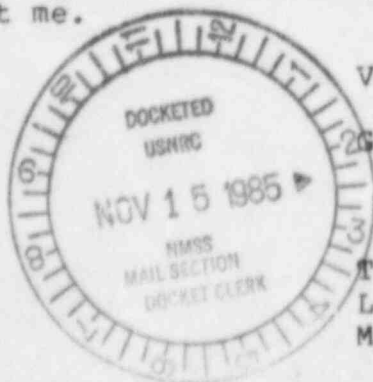

Subject: RADIOLOGICAL CONTINGENCY & EMERGENCY PLAN - REVISION 4

With respect to activities authorized by NRC License SNM-1097 and the commitment contained therein for review of the subject plan, General Electric Company Nuclear Fuel Manufacturing Department hereby submits Revision 4. This revision incorporates the following:

- o License conditions authorized by the NRC in SNM-1097 issued 6/29/84,
- o New process commitments (UPMP) authorized by Amendments 2 and 3 to SNM-1097 dated 12/17/84 and 2/26/85, respectively, and
- o Department restructuring which began in August 1984.

As the material incorporated impacts major portions of the Plan, the entire Plan is hereby reissued (with the exception of Appendix F, "Photographs, and Appendix G, "Maps", which should be transferred from the currently approved Plan). The changes incorporated have received prior review by the NRC; there is no decrease in the effectiveness of the Plan with these changes. ✓

If you require further information related to this matter, please contact me.

Very truly yours,

GENERAL ELECTRIC COMPANY

*T. Preston Winslow*
