Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
United States Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Denton:

The enclosed materials comprise Revision 4 to the Davis-Besse Course of Action (COA) submitted to you on September 10, 1985 (Serial No. 1182). This submittal provides Toledo Edison's responses to:

- NRC Maintenance Safety Evaluation Report (SER) dated October 30, 1985 (Log No. 1844)
- Request for Additional Information (31 questions) dated October 30, 1985 (Log No. 1844)
- NRC Evaluation of Root Cause Findings Reports dated October 30, 1985 (Log No. 1845)
- Additional Question (designated Question 32 by Toledo Edison) dated November 7, 1985 (Log No. 1857)
- Auxiliary Feedwater Pump Turbine Overspeed concerns stated in NRC letter dated September 6, 1985 (Log No. 1813)
- NRC Reviewer questions concerning Source Range Nuclear Instrumentation provided in a conference call of October 30, 1985 between Toledo Edison and NRC Staff.

To assist your Staff in the review of this document, a matrix cross-referencing your Staff's questions to the location of the responses in the text and appendix section has been prepared and is included as Attachment 1 to this letter.

Toledo Edison is providing a tracking report of commitments to be completed, both pre- and post-startup, in a revision to Appendix III-1 contained within this document. During the week of December 1, 1985, Toledo Edison will submit a summary schedule (Level 2) of activities to be completed prior to restart.
