Re: Amendment to radioactive materials license no. 12-20362-01

Gentlemen:

This is in request of amendment to the above referenced radioactive materials license to authorize possession of two (2) Tracer Lab/ICN, model BS and/or RA-2 Sr-90/Y-90 eye applicator therapy sources. These will be picked up personally by Stan Buhr and/or Jim Mikowski at the residence of the deceased Dr. Rudemann in Detroit, Michigan. The sources will then be transported in our vehicle, according to NRC/DOT regulations and procedures described in our current license application, to the Standard Nuclear Consultants, Ltd. facilities and stored in the sealed source storage area as described in our current license application. We will then either transfer the sources to another NRC authorized licensee, or use them for instrument calibration purposes.

Our check in the amount of \$60.00, payable to the U.S. Nuclear Regulatory Commission, is enclosed to cover the amendment application processing fees.

Sincerely,

Jim Mikowski
