Subject: Transfer of licensed activities from Lehigh Asphalt to Barletta Materials		
<p><u>Summary:</u> Ms. Zubey provide the following information concerning the transfer of licensed activities:</p> <ol style="list-style-type: none"> 1. Lehigh has always possessed the one gauge which they currently possess, 2. The gauge has always been stored in the location depicted in the amendment request from Barletta, 3. The gauge has always been leak tested March and September of each year and has never been shown to have a leaking source, 4. The licensee has a complete set of records which they will be turning over to Barletta after the transfer is completed. <p>Mr. Kairis stated that they have 3 gauges currently under their license (i.e., Two moisture density gauges and one roof gauge) not counting the one from Lehigh. Mr. Kairis also stated that the list of individuals on the license is accurate. I informed him of the information that Ms. Zubey had given me and that I would not be adding the names of the Lehigh authorized users to the license since they had attended the manufacturer's training course and they have a generic license.</p>

RE: NUCLEAR LICENSE

Dear Sir,

We, Lehigh Asphalt, would like to have our nuclear license terminated after an amendment is made to Barletta Material's license to add our gauge. All associated paperwork and regulations as per Barletta's license would be adhered to by Lehigh Asphalt. The RSO for Lehigh Asphalt would be George Kairis and he will be responsible for meeting all requirements mandated by the NRC.

If there are any questions concerning this change please feel free to contact Scott Dmytrow at Lehigh Asphalt or George Kairis at Barletta Materials. Thank you for your time and cooperation in this matter.

Sincerely yours,

Vincent P. Angelo
