Mr. James Stone
Project Directorate IV-2
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555-0001

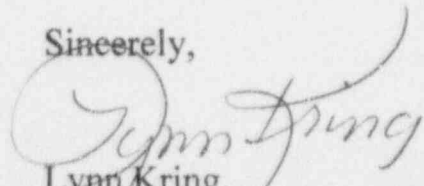

Dear Mr. Stone:

I appreciate the opportunity to review the Environmental Assessment for your project, "Request for Exemption from 10 CFR 70.24 Criticality Monitoring Requirements - Wolf Creek Generating Station". Due to the large numbers of documents that we receive, I was able to provide only a quick overview of the project; not the comprehensive review and constructive evaluation which your effort warrants.

Based on my limited review I have concluded that we have no comments to offer at this time. If, however, conditions change or any problems arise with your project, please contact me at 913/551-7456 and we will work with you to resolve those issues.

Again, thank you for accommodating our involvement with your efforts.

Sincerely,

Lynn Kring,
NEPA Program Manager
