

NOV 21 1985

Docket Nos. 50-317
50-318

Baltimore Gas and Electric Company
ATTN: Mr. A. E. Lundvall, Jr.
Vice President, Supply
P. O. Box 1475
Baltimore, Maryland 21203

Gentlemen:

Subject: Inspection Report Nos. 50-317/85-29; 50-318/85-30

A routine safety inspection of transportation activities was conducted by Mr. Percy Clemons of this office on October 21-25, 1985 at Calvert Cliffs Nuclear Power Plant, Units 1 and 2. Areas examined during this inspection included shipment records, waste classification and characterization procedures, purchase orders, advance notification, outstanding items, training, audits, and an outage job briefing.

On October 24, 1985, Mr. Clemons participated in a pre-job briefing that was presented by the Radiation Safety-ALARA Group Supervisor. All personnel participating in the steam generator nozzle dam installation were in attendance. Discussions of the radiological hazards involved, planning for the job execution, and ALARA instructions were excellent and provided for effective minimization of workers dose.

Our inspector also verified the steps you have taken to correct a follow-up item brought to your attention in the enclosure to our letter dated January 29, 1985. We have no further questions regarding your actions at this time.

No violations were identified. No reply to this letter is required.

Your cooperation with us in this matter is appreciated.

Sincerely,
Original Signed By:

Donald R. Bellamy

for Thomas T. Martin, Director
Division of Radiation Safety
and Safeguards
