

Radiation Therapy Department
Bozeman Deaconess Hospital
22 West Beall
Bozeman, MT 59715

February 20, 1985

Regional Office
U. S. Nuclear Regulatory Commission
611 Ryan Plaza Drive, Suite 1000
Arlington, Texas 76010

Attn: Mr. Charles Cain

Dear Sirs:

This letter pertains to the application by Bozeman Deaconess Hospital for a license to operate the Cobalt Teletherapy Machine which has been operated by InterCity Radiological Laboratories under License No. 25-14896-01. Please refer to submitted Application Form 76011.

Bozeman Deaconess Hospital, in the past, has always owned the premises, including the building, where this Cobalt Teletherapy Unit has been in operation. InterCity Radiological Laboratories has leased the space from Bozeman Deaconess Hospital and has been the owner of the Cobalt Teletherapy Machine and has been responsible for its licensure and operation. This arrangement is now changing - Bozeman Deaconess Hospital is buying the machine from InterCity Radiological Laboratories and wishes to assume the operation of this Cobalt Teletherapy Facility, and has arranged for the Radiologists of InterCity Radiological Laboratories to bill patients separately for their services.

Bozeman Deaconess Hospital is therefore applying for licensure, and wishes to continue the operation of this facility on the basis of the same arrangements and operating conditions that have been previously authorized by the Nuclear Regulatory Commission in connection with the Commission's licensure previously issued to InterCity Radiological Laboratories, including amendments (License No. 25-14896-01).

The Administrator of Bozeman Deaconess Hospital agrees to abide by the same licensure conditions.

Page 2

The address of this Radiotherapy Treatment Facility will be:

Bozeman Deaconess Hospital
Department of Radiation Therapy
22 West Beall
Bozeman, MT 59715

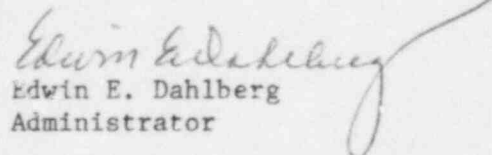

Although this address is different from that previously registered, there is no actual change in the physical aspects or location of this Cobalt Teletherapy Facility. Bozeman Deaconess Hospital occupies the space between Lamme Street and Beall Street, and the address will merely refer to the Beall Street entrance, rather than the Lamme Street entrance. The reason for this also includes an anticipated move of some parts of the Hospital to a new site some time during 1986. However, the Radiation Therapy Department will not be moving.

Furthermore, there will not be any change in the physical features of the Cobalt Teletherapy Machine, nor its immediate environment, its shielding, its housing, or its position within the building.

Those individuals whom Bozeman Deaconess Hospital wishes to have authorized to use the Cobalt Teletherapy Machine, under the license to be issued to Bozeman Deaconess Hospital, are the same individuals that have been authorized to use the machine under the license issued to InterCity Radiological Laboratories.

Sincerely,

BOZEMAN DEACONESS HOSPITAL

Edwin E. Dahlberg
Administrator
