March 25, 1997

Document Control Desk  
U. S. Nuclear Regulatory Commission  
Washington, DC 20555

ATTENTION: T. R. QUAY

SUBJECT: AP600 DESIGN CERTIFICATION; COMPLETION OF DOCUMENTATION FOR  
SSAR SECTION 6.1.

References: SECY-97-051, "Schedule for the Staff's Review of the AP600 Design Certification  
Application," dated February 26, 1997, forwarded by NRC letter "Westinghouse's  
Support of the Nuclear Regulatory Commission Review of the AP600 Design  
Certification Review," dated March 6, 1997.

Dear Mr. Quay:

This is to confirm completion of submittal of final documentation related to SSAR Section 6.1 for our application for AP600 Design Certification. The Reference includes a milestone "Applicant Submits Final SSAR Revision & Documentation" by May 1997. Westinghouse interprets this to require NRC acknowledgement of receipt of final documentation supporting our application for AP600 Design Certification. To support this milestone, NRC and Westinghouse maintain a detailed activity plan which provides schedule goals for most SSAR/FSER sections and related activities, such as, the PRA, code validation, and ITAACs. In this detail activity plan, Westinghouse application input and NRC internal FSER input for Section 6.1 of the SSAR had a schedule goal of December 31, 1996. NRC and Westinghouse also maintains a joint open item tracking system to informally monitor the status and history of open items (DSER, RAI, meeting, and other) associated with our application.

Based upon a review of the information provided for Section 6.1 of the SSAR and a review of the related open item entries in our informal tracking system, Westinghouse confirms completion of the submittal of information to support this portion of our application. Any additional questions or requests for additional information on Section 6.1 of the SSAR which require formal response must be received by Westinghouse by May 9, 1997 in order to support the May 1997 milestone in SECY-97-051.

If you have any questions on this letter, please contact J. W. Winters (412-374-5290) or  
D. A. Lindgren (412-374-4856).

  
Brian A. McIntyre, Manager  
Advanced Plant Safety and Licensing
