Docket No. 50-206

Southern California Edison Company
2244 Walnut Grove Avenue
Rosemead, California 91770

Attention: Mr. Harold B. Ray, Vice President and
Site Manager, San Onofre

Gentlemen:

Subject: Requalification Program Evaluation, Unit 1

On July 9-11, 1985, the NRC conducted an evaluation of the requalification program at San Onofre Nuclear Generation Station, Unit 1. The preliminary findings discussed with those members of your staff at the conclusion of the evaluation are contained in the enclosed report.

Per NUREG-1021, Operator Licensing Examiner Standards, the overall evaluation of the program adequacy must fall into one of three categories: "Satisfactory", "Marginal", or "Unsatisfactory". The criteria for this determination are summarized in the enclosure and are detailed in NUREG-1021, ES-601.

During this requalification cycle four Reactor Operators and three Senior Reactor Operators were examined. The NRC prepared and administered the July 9, 1985 written, and oral examinations. In addition, the examiners reviewed the records of the requalification program to verify its implementation. All seven operators passed the written and oral examinations. Based on the criteria in NUREG-1021, the requalification program at San Onofre Nuclear Generating Station, Unit 1 is evaluated as satisfactory.

In accordance with 10 CFR 2.790(a), a copy of this letter and enclosure 1, Examination Report, will be placed in the NRC Public Document Room.

Should you have any questions concerning this letter, please contact us.

Sincerely,

R. J. Pate
