Perry Nuclear Power Plant  
Docket No. 50-440  
Submittal of a Proprietary Calculation in Support of the License Amendment Request for  
"Revision of Main Steam Line Leakage Requirements and Elimination of the Main Steam  
Isolation Valve Leakage Control System" (TAC No. M96931)

Ladies and Gentlemen:

An engineering calculation is provided as an enclosure to this letter, in support of a license amendment request that was submitted by letter dated August 27, 1996 (PY-CEI/NRR-2076L). The license amendment request involves revision of the Main Steam Line leakage requirements and elimination of the Main Steam Isolation Valve Leakage Control System. The enclosed calculation PSAT 04202H.08 is considered to be proprietary in nature. The required affidavit from Polestar Applied Technology, Inc., attesting to the proprietary nature of this document, was included as part of the August 27, 1996 letter, and is therefore not resubmitted as part of the enclosure to this letter. A non-proprietary version of this calculation was provided as part of the August 27, 1996 letter.

If you have questions or require additional information, please contact Mr. Henry L. Hegrat,  
Manager - Regulatory Affairs, at (216) 280-5606.

Very truly yours,

for Lew W. Myers
