President
P. O. Box 1479
Bemidji, MN 56601

Gentlemen:

Enclosed is Amendment No. 28 to your NRC License No. 22-16328-01 in accordance with your request.

Please be advised that we have also received a letter dated September 14, 1984 from Ben Sanderson requesting that your licence be amended to include the name of Glen Roush, M.D. as an authorized user of radioactive material. Before we can grant that authorization, however, it will be necessary for the following additional information to be submitted.

1. A description of Dr. Roush's experience actually handling radioactive material. Include specific isotopes and maximum amounts (activities), the dates and location where the experience was obtained, and the purpose for which the material was used. This experience may have been obtained in conjunction with Dr. Roush's clinical training, but should be described separately to differentiate it from patient examination, image interpretation, etc. (This information is normally documented in Item 5 of NRC Form 313M - Supplement A enclosed).
2. A signed copy of the letter dated September 14, 1984 requesting the amendment. (We are returning a copy of the letter for your convenience.

When submitting your response, please state near the top of the letter "This is additional information, not a new request."

Please review the enclosed document carefully and be sure that you understand all conditions. You must conduct your program involving radioactive materials in accordance with the conditions of your NRC license, representations made in your license application, and NRC regulations. In particular, note that you must:

1. Operate in accordance with NRC regulations 10 CFR Part 19, "Notices, Instruction and Reports to Workers; Inspection," 10 CFR Part 20, "Standards for Protection Against Radiation," and other applicable regulations.
2. Possess radioactive material only in the quantity and form indicated in your license.

8512060282 841023
REG3 LIC30
22-16328-01 PDR

3. Use radioactive material only for the purpose(s) indicated in your license.
4. Notify NRC in writing of any change in mailing address.
5. Request and obtain appropriate amendment if you plan to change ownership of your organization, change locations of radioactive material, or make any other changes in your facility or program which are contrary to your license conditions or representations made in your license application and any supplemental correspondence with NRC. Any amendment request should be accompanied by the appropriate fee specified in 10 CFR Part 170.
6. Submit a complete renewal application with proper fee or termination request at least 30 days before the expiration date on your license. You will receive a reminder notice approximately 90 days before the expiration date. Possession of radioactive material after your license expires is a violation of NRC regulations.
7. Request termination of your license if you plan to permanently discontinue activities involving radioactive material prior to your expiration date.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions and representations in your license application will result in enforcement action against you in accordance with the General Policy and Procedures for NRC Enforcement Actions, 10 CFR Part 2, Appendix C.

If you have any questions or require clarification of any of the above stated information, contact us at (312) 790-5625.

Sincerely,

Original Signed
B. J. Holt

SUBJECT

SUMMARY

I asked if ~~Rte 7~~ for a more
clarifying address of the proposed
facility in Brainerd, MN.
Mr. Carlson said that the
facility is actually located
in Baxter, MN. on Highway 210,
Rte. 7. But the mailing
address is Brainerd.
