Madison, Ohio 44057

License No. 34-16763-01

63-1162

Gentlemen:

This refers to the routine safety inspection conducted by Mr. M. Kunowski of this office on January 15, 1986 of activities authorized by NRC Byproduct Material License No. 34-16763-01 and to the discussion of our findings with you, Dr. Gordon, and Ms. Linda Smith at the conclusion of the inspection.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.

During this inspection, certain of your activities appeared to be in violation of NRC requirements, as specified in the enclosed Notice. A written response is required.

Violation No. 5, in part, is a repeat item. In your response to this violation, please describe why your proposed corrective action is expected to be more successful in preventing future or similar violations than the corrective action specified in your November 10, 1982 letter.

In addition to our concern for corrective action with respect to the specific violations noted, we are concerned about your management control system that has permitted these items to occur. Consequently, in your reply to this letter, please describe those actions taken or planned to improve the effectiveness of your management control over your licensed activities to preclude the recurrence of these or similar violations. The enclosed Appendix B, Management Control, is provided for your information and guidance.

The responses directed by this letter and the accompanying Notice are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 86-511.
