Dallas, Texas 75201

Gentlemen:

This refers to the inspection conducted by W. P. Haass, A. Vietti-Cook, C. Early, and G. L. Madsen during the period August 26-29, 1985, regarding the TUEC programs established to identify and investigate safety concerns of workers at the Comanche Peak plant site, and to the discussion of our findings with W. G. Council and other members of your staff on November 5, 1985.

Areas examined during the inspection included the applicant's policies, procedures, and implementation relating to the Comanche Peak site Ombudsman and SAFETEM programs. These programs were set up to provide a mechanism to receive, evaluate, and resolve concerns which might not otherwise come to the attention of TUEC or to the attention of the NRC. Because these programs fulfill an important function, we decided to evaluate their effectiveness even though these programs are not specifically required by NRC regulations. The inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspectors. These findings are documented in the enclosed inspection report.

The NRC Office of Investigation provided followup on the concerns relating to wrongdoing matters.

Although the NRC inspectors did not identify any violations or deviations, some areas for improvement are identified for consideration by Texas Utilities for enhancement of the SAFETEM program.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

Original Signed By

E. H. Johnson

E. H. Johnson, Acting Director
Division of Reactor Safety and
Projects
