Gentlemen,

Please find inclosed two copies of the Application for Material License filed by the University of Dayton, Dayton, Ohio. The University has been licensed in the past, License number 34-07958-01, Amendment 16. That license expired February 28, 1985. We regret that this application was not filed in time to avoid expiration of the former license.

Please note that Item 12 has been marked "Exempt - Category 3L". This marking was made on the directions of Ms. Cheryl Phillips of the USNRC Washington office.

The University requests that, if possible, this application be expedited so that research and teaching activities requiring byproduct material will undergo a minimum delay.

Sincerely,

*Richard S. Harmer*
