

COMMISSIONER

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555

RELEASED TO THE PDR	
4/10/97	Stw
date	initials

January 28, 1997

MEMORANDUM TO: Chairman Jackson
Commissioner Rogers
Commissioner Dicus
Commissioner McGaffigan

FROM: Commissioner Diaz *[Signature]*

SUBJECT: COMSECY-96-068: DECOMMISSIONING - POWER
REACTORS (DSI-24)

I support Option 2; to pursue current direction and approaches more aggressively. The NRC should work to expedite the current decommissioning effort and to clarify the decommissioning process. This effort should result in a clear set of technical requirements (e.g., site release criteria) and financial requirements for decommissioning. This should be done with careful consideration of the impact on the safety and reliability of the operating plants during their last years of operation and on the decommissioning facilities so as to provide regulation ensuring safe and efficient decommissioning.
