Tulsa, Oklahoma 74132

Gentlemen:

SUBJECT: CONFIRMATION OF ACTION LETTER

This refers to your letter of December 31, 1985, regarding the actions you plan to take to improve the safety of your industrial radiography program in answer to the concerns expressed by NRC staff members at the Enforcement Conference held December 12, 1985.

We understand that you are committing to:

1. The use of a consultant to perform quarterly inspections of your operations, including field inspections of radiographers.
2. Quarterly radiation safety meetings for the next year.

In addition, we note that you will be using portable shields where practical, using collimators during all radiography operations, and implementing an ALARA program. In your telephone conversation with Mr. Jerry Everett of my staff on February 5, 1986, you indicated that implementing an ALARA Program was a considerable undertaking and you wanted to evaluate the results of the program after 6 months. At that time, if you plan to continue the ALARA Program, you would submit a request for a license amendment that would incorporate the program into your license.

If this is not your understanding of your course of action and commitment, please contact us immediately.

Also, please supply information as to the percentage of radiographers which will be inspected in the field by your consultant.

Sincerely,

ORIGINAL SIGNED BY
