ADDIT

Also, two minor typographical errors on this page as previously submitted have been corrected.

Proposed page TS.6.0-5: incorporation of NUREG-0737.

In conformance with the guidance of NUREG-1431, the requirements for emergency operating procedures includes the base document NUREG-0737.

A revised Safety Evaluation, Significant Hazards Determination and Environmental Assessment have not been submitted with the changes proposed by this letter since these evaluations, as originally presented in the December 14, 1995 submittal, continue to bound the proposed license amendment as modified by this supplement.

All recently issued License Amendments which would impact the subject License Amendment Request and its supplements were addressed in the November 25, 1996 supplement.

If you have any questions related to this information in support of the subject license amendment request, please contact myself or Dale Vincent at 612-388-6758.
