

February 10, 1986

Docket No.: 50-245

LICENSEE: Northeast Nuclear Energy Company (NNECO)
FACILITY: Millstone Nuclear Power Station, Unit No. 1
SUBJECT: MEETING SUMMARY - FULL TERM OPERATING LICENSE

NNECO and NRC representatives (attendance list enclosed) met in Bethesda, MD on January 15, 1986. The purpose of the meeting was to discuss the actions required to convert the Millstone 1 Provisional Operating Licensing (POL) to a Full Term Operating License (FTOL).

The Millstone Point Company (now NNECO) submitted a request for a FTOL dated September 1 1972 and the subsequent Federal Register Notice (37 FR 25187) dated November 28, 1972 specified that the proposed full term license should expire 40 years from issuance of the construction permit as requested by NNECO; i.e., May 19, 2006. A later NNECO submittal dated January 15, 1982 requested that the license extend 40 years from the date of the Provisional Operating License, i.e., to October 20, 2010.

There was unanimous agreement amongst those present that a different expiration date than that identified in the 1972 Federal Register Notice would require renoticing, as a substantive change to the proposed action. Consequently, NNECO should either withdraw their later request or formalize and supplement it with an evaluation adequate to revise and renotice the license conversion.

In addition, the staff noted that the existing license and Technical Specification will be used to prepare the FTOL which will be forwarded to NNECO for formal review before the FTOL is issued.
