

NOV 29 1985

Docket No. 50-354

Public Service Electric and Gas Company
ATTN: Mr. R. L. Mittl, General Manager
Nuclear Assistance and Regulation
80 Park Plaza T22A
Newark, New Jersey 07101

Gentlemen:

As you are aware, 10 CFR 170 of the Commission's regulations for license and inspection fees was revised effective June 20, 1984. Section 170.12(b) of the revised rule provides that for applications for permits, licenses, facility reference design approvals, and special projects which have been on file with the Commission for review for six months or longer, billings would be made at six-month intervals or when the review is completed, whichever is earlier.

Consistent with the requirements of 10 CFR 170.12(b), we have completed the cost analysis for the Hope Creek 1 OL application review for the period June 24, 1984 through December 22, 1984. The cost through that period is \$764,651. The enclosure is a breakdown of the review costs by program office. Based on a reexamination of the costs by the Office of Nuclear Reactor Regulation for the previous billing period, an adjustment of \$1,518 has been made to the bill leaving a balance due of \$763,133. The Office of Resource Management has been notified to bill your Company for this amount. When making payment, please make reference to the bill number.

Sincerely,

Original Signed By
Wm. O. Miller

William O. Miller, Director
License Fee Management Staff
Office of Administration
